**MANAGING RISKS,
ENSURING CONSTRUCTION
PROJECT ON TRACK**

www.attrackpmc.com

Bio:

When talking about some of the world's most difficult tasks, construction tops the list. Any one mistake can result in significant delays and budgetary issues in any construction project. Careful management and implementation of a project, is of indispensable value when correlating the high financial stakes at risk.

This is exactly why; we limit our services to project management only. We are not into design or contracting, so our clients can ensure clarity related to our sole objective that is to complete project within budget and time limit keeping quality standards. We bring value to the table and that value is easy to see at every stage, from conception to completion.

Our LOGO

ATTrack's logo represent as a mark of being “On track” for each and every activities which impacts project goals. This further means that, being on time, on budget and also on standard quality parameters.

Vision

ATTrack's vision is to become a globally acclaimed company, well capable to deliver projects under constraints with good management skills, latest technology and clarity.

Mission

1. We want to get affection by achieving goals according to client's objectives with the help of our best services.
2. We work for our clients in such a way that, they do not have to take the maximum risk and always stay away from any other claims.
3. Time, cost and quality benchmarks which we set during pre-construction stage, same we do confirm at the handover stage.
4. We take suitable steps to ensure safe working on project site, we are committed to adhere health and safety rules and we follow during works.
5. Taking care of the environment, community, customers and people is our practice, which is integral part of successful completion of any project.
6. We ensure with the help of training, that our employees and colleagues are able to deliver results to the best of the ability.

Values

"This whole earth is our family", so we are committed to discharge all our responsibilities in the same manner that we handle things for family members. In which we also ensure that there is no unnecessary waste of resources. Ethics, integrity, trust are the main pillars during the works. We maintain them and that is our foundation.

Safety

No business objective has higher priority than safety

History & Philosophy

ATTrack PMC began with a strong vision, which seeks to transform past data of construction projects in the context of the owner's side. The foundation of the company was laid on 2017 by our Managing Director Mr. Subabrata Biswas, who is himself a civil engineer graduate and is a trained and certified project management professional. And who has vast experience of 20 years as a leader with a track record of completing projects for more than \$ 100 million.

ATTrack PMC further incorporated as a (OPC) Private Limited by the Ministry of Corporate Affairs (Government of India) on dated 28th June 2019. ATTrack PMC is ISO 9001: 2015 certified and successfully working as the eyes and ears of our client's. We are the only "for-fee-only" project management company in India, providing benefits to our clients.

Our objective is to visualize the project as per client's prospective and provide real value with the help of strategies. Implementation of experience and technology at bottom level of construction activities to achieve best outcomes. Ensuring consistency, clarity and focusing on solutions for successful delivery of project within time limit, with best quality standards and budget.

Our Services:

1. Program Management

ATTrack's comprehensive program management services help keep multiple, interrelated projects in sync, on-time and within budget. We help owners, financial institutions, sureties and others reduce the uncertainty and risk in their capital programs. ATTrack reviews every detail of all projects, set-up objectives, plans and priorities, manage and control the process and identify and resolve problems.

2. Project Management

Pre-Construction Management

Understanding the requirement of the client and setting up strategies. This process includes advising, monitoring and reporting. ATTrack initiates the project by providing schedule with time line and estimated budget. The overall objective of the Pre-Construction process is to improve efficiency, reduce cost and time, maintaining quality standards.

- **Phases of Pre Construction Management**

- Project definition.
- Project administration.
- Due diligence for appointment of architect and other consultants.
- Design management and coordination and implement opportunities for cost savings and time schedule.
- Procurement management/Tender and Bid management
- Risk management
- Value Engineering and management

☛ **Construction Management**

We manage entirely. ATTrack starts the construction management process during the preliminary design stage when project planning milestones are established, construction concepts are developed, and the overall plan is prepared.

ATTrack will prepare a construction management strategy, procedure and undertake strategy of overseeing the Contractor's/ Sub-contractor's supervision team at site. Check whether any contractor is defaulting and also take corrective measure to ensure everything as plan. Monitoring their established processes and implementation of quality control plan to obtain standard quality outcomes.

As a Client Representative, ATTrack will represent client's best interest in interactions with contractors, major sub-contractors and all other consultants.

- **Phases of Construction Management**

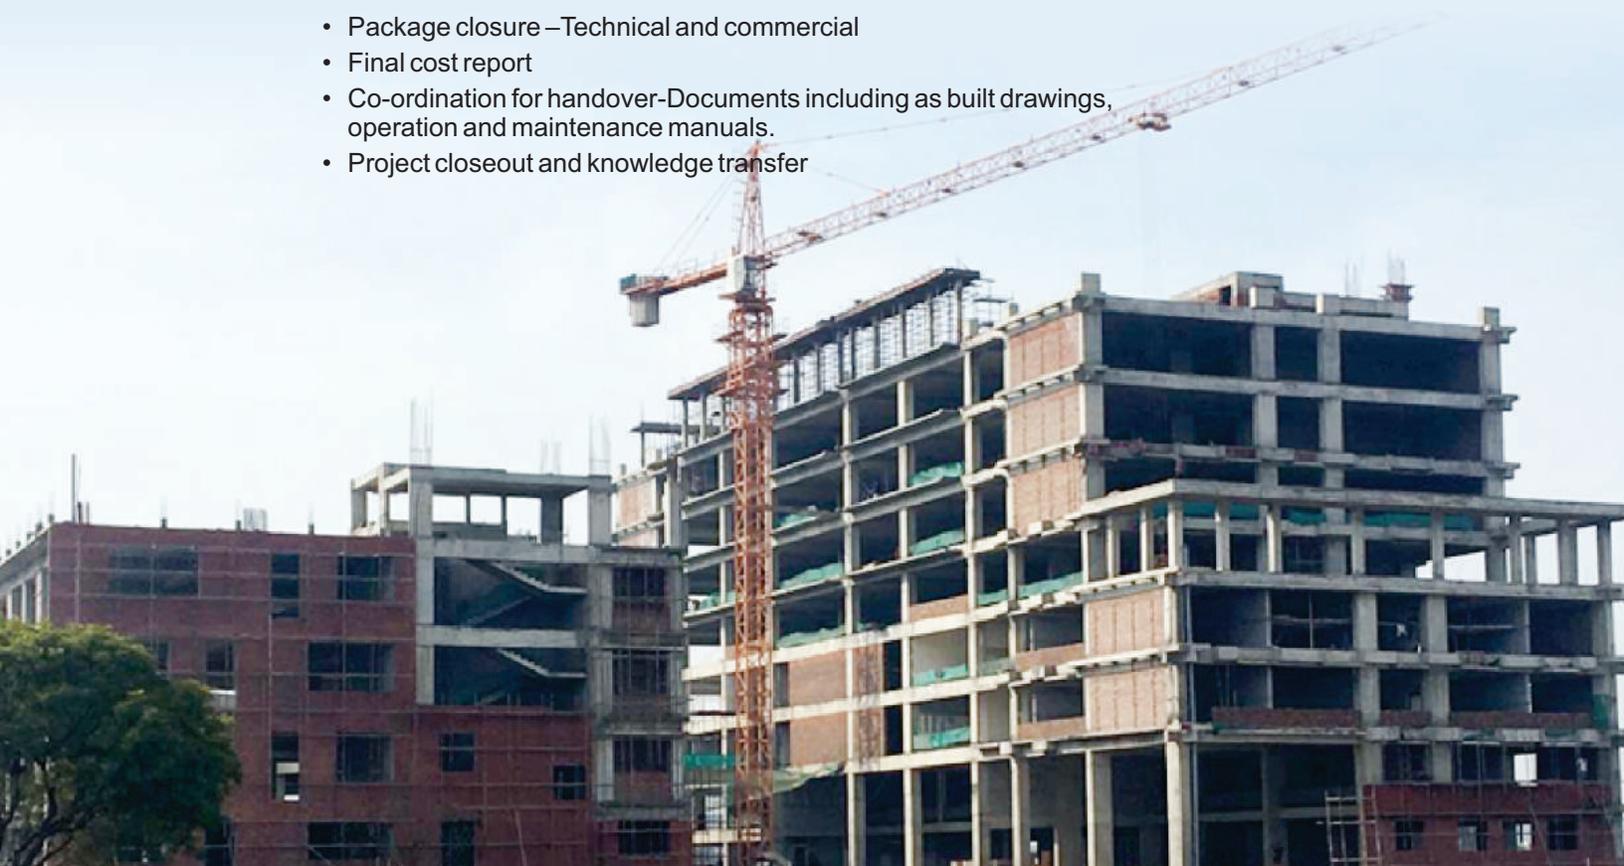

- Appointment of contractors.
- Planning management/Forecasting Management
- Cost management and cash flow management
- Site management
- Quality control
- Environment, Health & Safety management
- Co-ordination with client, architect and other consultants

☛ **Post Construction Management**

We report and validate entirely. Through our post construction management services we ensure that the project is handed over to the client in a controlled and disciplined manner. ATTrack will also coordinate for the handover of all documents including as built drawings and approved O&M manuals by the Contractors/ Vendor.

- **Phases of Post Construction Management**

- Package closure – Technical and commercial
- Final cost report
- Co-ordination for handover-Documents including as built drawings, operation and maintenance manuals.
- Project closeout and knowledge transfer

3. Project Surveillance and Management

ATTrack's project management surveillance teams provide timely and objective reporting, from evaluating the performance of the construction manager, designer and contractors, to monitoring schedules and analyzing costs. Teams include specialists in all phases of construction, so the myriad events that occur on a project can be assessed and evaluated in a timely way by the right expert, and benefiting clients with recommendations technically and financially.

4. Puzzled Project Reversal and Management

While project management is most effective when implemented before construction begins, our management support can also help clients regain control after problems have caused delays or overruns. To “Get On Track” a project, ATTrack's teams design new schedules, create new plans and implement procedures to get the project back on track.

5. Facilities Management

For our Facilities Management (Hard FM) assignments, we align the best model, processes and procedures with the best resource and maintenance regime to make certain facilities function correctly, efficiently and safely throughout their life cycles. ATTrack offers a bespoke Hard FM solution that begins at project kick-off, connecting with clients and building relationships with installation contractors, management teams, designers and manufacturers to deliver buildings best suited to their mission.

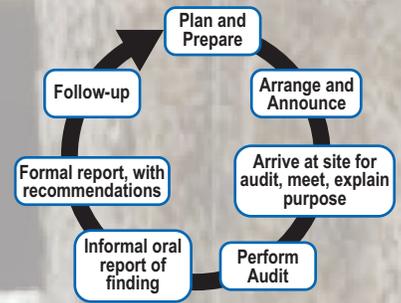

6. Quantity Survey and Estimation, Bill Verification and Audit

- Analysis of Rates based on CPWD, Standard Data Book of the Ministry of Road Transport and Highways and State Schedule of Rates.
- Preparation of Preliminary Project Estimates for Feasibility and cash flow.
- Preparation of Detailed Cost Estimates for Detailed Projects Report.
- Preparation of Bid documents for item Rate Contracts, EPC Contracts, preparation of Request for Qualification (RFQ), Request for Proposal (RFP), Conditions of Contract/Contract Agreements.
- Preparation of additional Technical Specifications for non-scheduled items i.e, for which specifications are not available in any standard data books.
- Providing help to Client / Employer for Bid evaluation and formation of Contract Agreement.
- Preparation of Bar Bending Schedule (BBS).
- Tender review, analysis and Preparation of Letter of award and contracts.
- Checking of measurements/quantities, material reconciliation and validation and Monthly project cost report
- Preparation of Final Accounts
- Audit and validate RA and Final Bills.

7. Quality Audit

ATTrack deploys a team of experienced Quality Engineers in projects. They apply quality management techniques under guidance of our Senior Management, to review the construction activities and report risks and defects and recommend improvement in quality wherever it is below acceptable norms. Following are the details:

- Prepare a Quality Manual for the site.
- Study of Contract Documents, Technical Specifications, Tender Documents and GFC drawings.
- Audit, verify and certify quality of work already done at site w.r.t BOQ, IS Codes, Technical specifications given by the architect in the tender documents and GFC drawings.
- Advise site team on remedial measures to be taken after consulting respective consultants.
- Review Quality and Make of materials – cement, steel, aggregates, sand, concrete and others – from challans, site test reports, external test reports, manufacturer's certification etc.
- Review material testing reports w.r.t IS codes (Relevant Codes) and standards, propose procedural corrections, if any.

“ **QUALITY IS ROYALTY** ”

8. Safety Audit

ATTrack undertakes Environment, Health and Safety audit for large and complex projects where in safety team identifies the various risk involved in project and proposes the mitigating plan. Following are the details:

WEAR SAFETY EQUIPMENT

SAFETY HELMET MUST BE WORN

SAFETY SHOES MUST BE WORN

SAFETY GLOVES MUST BE WORN

SAFETY GOGGLES MUST BE WORN

- Establish minimum EHS standards for the project.
- Deploy resources required to ensure safe working atmosphere
- Suggest fall protection system
- Establish risk assessment and mitigation plan
- Establish safe working method statements for critical activities
- Check various permits to work
- Regular inspections to identify and correct unsafe situations
- Conduct consistent awareness programs
- Give task related instructions to workers
- Conduct regular safety meetings with engineers and labour
- Establish effective emergency evacuation system

“ **WORK IS MUST BUT SAFETY IS FIRST** ”
